

Public Works/Utility March 2015 Council Report

WASTEWATER

- WWTP Construction is at 50% completion
- Administration is working on a FOG (fats, oils, grease) program to send a newsletter to Whitestown residents to make them aware of what they should and should not put down their drains in their homes.
- Administration is working with Whitestown legal staff to update our Sewer Use Ordinance.
- Pipe patching program is ongoing to help reduce infiltration into our collection system.

WATER

- Staff has been performing flow tests on hydrants in various sections of Whitestown and putting the data into our GIS.
- Administration is working on gathering data for our annual water quality report that is to be submitted to IDEM and mailed to all customers by June 1.
- Administration is working on filing our water utility resource report for the IURC that is due by April 1

STREET DEPARTMENT

- Administration is obtaining quotes for repairing and resurfacing many areas of failing pavement sections on Main St.
- Administration is obtaining quotes for the resurfacing of CR 450 South.
- Staff used 130 tons of treated road salt in February.
- Whitestown is teaming up with the Boone County Highway Department on a road Paser Rating program to provide a priority list of our entire road resurfacing needs and place them on a maintenance program.
- Administration is looking at various options for the construction of a salt storage facility.

DPW is proud to announce that Bryan Leach will be moving into the role of Infrastructure Inspector on April 1. This will be very beneficial to the utility to have an inspector performing inspections to all jobsites and projects on a full-time basis. David Anderson will be doing all of our utility locates starting April 1 as well as continuing his current role in water distribution operations.
